DETAILED ACTION***Election/Restrictions***

This application contains the following patentably distinct species of the claimed invention: Species I is directed to selecting icons on a display as illustrated in figures 3a – 4, species II is directed to directed to selecting a portion of a scene on a display illustrated in figures 5a – 8, species III includes is directed to using a cursor to perform image processing on a captured image illustrated in figure 9, and species IV is directed to moving the position of the camera to move a cursor with the effect of highlighting a thumbnail image to select the captured image to input printing instructions as illustrated in figures 10a and 10b.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2612

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
